# P1.3 USER SCENARIO MAPPING

## SCENARIO

Xiomara has an hour long commute from work. She forgot to buy groceries over the weekend and didn't have any meals prepped. After searching for restaurants along her route home she found Get In My Bowl, locally owned Asian-fusion restaurant in Alexandria, VA known for their wide selection of noodle dishes. Xiomara places an online pickup order for their Drunken Noodles before she leaves work, so it will be ready by the time she arrives.

## RESOLUTION

She finds Get In My Bowl, peruses their menu, and places an order for pickup. It is ready once she arrives, and she gets to enjoy her dinner without having to grab groceries.

## ACTOR

Xiomara

## MOTIVATOR

Hour long commute from work

## INTENTION

Xiomara wants to pick up dinner on her way home from work instead of buying ingredients or cooking.

## ACTION

Xiomara searches online for a restaurant that's on her way home from work. She looks for places that offer online ordering and pickup services so she won't have to wait for her food to be prepared.

# THANK YOU.

I held off taking this class for four years because I was dreading web design. I ended up loving it. I am very proud of my work and am interested in becoming a web designer (shocking!!). I'm so glad I'm closing out my college years with this course.
